1 Connect your cameras
- Connect the Cat5e cable into the camera
- Connect the other end of the Cat5e cable into the NVR PoE port.
(Repeat for all cameras)

2 Connect to your monitor/TV
- Connect your NVR and TV/monitor with a HDMI or VGA cable (Not included)
Note: Your monitor/TV must support the output resolution of the NVR or you may get a black screen or a possible error message. You cannot use a laptop as a display.

3 Connect the mouse and power
- Connect the mouse to the USB port
- Connect the NVR power cable to the NVR

4 Connect to your network (OPTIONAL)
- Connect the LAN port on the NVR to the LAN port on your router via an Ethernet cable for remote viewing on your mobile phone, tablets, PC and Mac
- You can also add existing IP cameras to your NVR from your network.
Note: The NVR will still work as a standalone video recorder if you do not have internet connection and skip this step.

5 Configure the start up wizard
- The connection is now completed. Turn on the power switch and follow the start-up wizard on your screen to configure the NVR. (Next Page)

We recommend testing all the cameras and cables prior to installation.
