

Configure start up wizard

The Startup Wizard will help you set up your system, as well as connect it to your network.

If you reboot your system and want the wizard to start again check this box.

Wizard

☒ Start wizard when device starts?

You are required to set up a password with a minimum of 8 letters or numbers for better security protection

Wizard

☐ Admin Password *****
☐ New Admin Password *****
☐ New Password *****
☐ Confirm *****

Select the applicable time zone, date/time format, and time.

Wizard

☐ Time Zone (GMT+08:00) Beijing, Urumqi, Singapore
☐ Date Format MM-DD-YYYY
☐ System Format 09-29-2014
☐ System Time 18:14:37

We recommend checking 'Enable DHCP' even if your DVR is not connected to the internet, this will automatically get the DVR IP address.

Wizard

☐ NIC Type 10M/100M Self-adaptive
☒ Enable DHCP
☐ IPv4 Address 192.0.0.64

Enable LaView P2P to allow mobile Viewing

Wizard

☒ Enable
Access Type: LaView P2P

The wizard will show additional network information, click 'Next' to proceed.

Wizard

☐ Server Port 8000
☐ HTTP Port 80
☐ RTSP Port 8554

To initialize the hard drive click the 'Init' box otherwise the DVR will not record.

Wizard

Capacity	Status	Property	Type	Free Space
1 465.76GB	Normal	R/W	Local	464GB

☒ Init

If you wish to add an IP camera click 'Search' otherwise, click 'Next' to proceed.

Wizard

IP Address	Amount	Model
1 192.168.1.36	1	CMIP3412

☒ Search

Choose continuous or motion detection recording from the listed options. Check the 'Start Recording' box to initialize recording. Click 'Ok' to finish the wizard.

Wizard

☒ Start Recording
☐ Continuous
☐ Motion Detection

QUICK REMOTE VIEW SETUP

View your cameras from anywhere! Access is as easy as a simple code scan.

Connect your cameras to the DVR.

Connect the DVR to your Network.

Download our free mobile app.

Scan the DVR QR code using our mobile app, and you're ready to view!

Troubleshooting

Problem	Possible Solution(s)
No display/No signal/Invalid format	<ul style="list-style-type: none">Make sure the VGA/HDMI cable is properly connected to both the DVR and TV/monitor. <i>NOTE: A laptop cannot be used as a screen</i>Make sure your TV/monitor is on the correct video input (e.g. HDMI1, HDMI2, etc.)Try switching to another 1080p TV/monitor and adjust the output resolution in the DVR menuOn the top of the DVR check that the power LED light is on
No picture/No video	<ul style="list-style-type: none">Make sure the camera is completely connected to the power splitters well as the Video In plug
Cannot log in	<ul style="list-style-type: none">Enable LaView P2P to allow mobile Viewing. If you don't remember your old password, please submit a ticket to us at www.laviewusa.com/contact/.
Camera picture is not clear	<ul style="list-style-type: none">Make sure the camera is not placed behind a window, there is no interference or a strong light source in front of the cameraIn DVR Menu>Record>Parameter>Resolution, set the sub stream resolution to CIF for all channelsMove the camera to a different location and/or direction <p><i>NOTE: The live view (sub stream) resolution is NOT the actual image quality recorded (Main stream); Connection of excessive length (over 600ft) of BNC cable will drop the camera image quality; Working at extreme weather condition (below -40F or above 140F) will drop the image quality and damage the camera.</i></p>
Night vision is not working	<ul style="list-style-type: none">The infrared activates automatically when the environment is dark enough. You can check that the camera infrared bulbs are working properly as they turn light red in dark environments
DVR is not recording	<ul style="list-style-type: none">Check that the hard drive status is normal and is initialized under the Main Menu>HDD>GeneralEnable the record mode (Normal or Motion Detection) under the Main Menu>Record>Schedule>Edit for the selected camera
