Configure start up wizard

Select the screen resolution from the drop-down menu based on your TV/monitor’s resolution.

Resolution
System Resolution: 1024 * 768/60HZ

Check this box if you wish to see this wizard again after you reboot your system.

Wizard
Start wizard when device starts?

We strongly recommend that you change the default Admin password ‘abc12345’ for better security protection.

Wizard
Admin Password:******
New Admin Password:
New Password Confirm:

Select the applicable time zone, date/time format, and time.

Wizard
Time Zone: IST-08:00 Pacific Time US & Canada
Date Format: MM-DD-YYYY
System Format: 09-29-2014
18:43:37

We recommend checking ‘Enable DHCP’ even if your NVR is not connected to the internet, this will automatically get the NVR IP address.

Wizard
Enable DHCP: 
IPv4 Address: 192.0.64.

The wizard will show additional network information, click ‘Next’ to proceed.

Wizard
Server Port: 8000
HTTP Port: 80
RTSP Port: 8554

To initialize the hard drive click the ‘Init’ box otherwise the NVR will NOT record.

Wizard
Capacity: 1, 465.76GB
Status: Normal
Property: Type: Free Space: 464GB

If you wish to add an IP camera click ‘Search’ otherwise, click ‘Next’ to proceed.

Wizard
IP Address: Amount: Model: 192.168.1.100: 1: DVR Pi

Choose continuous or motion detection recording from the listed options. Check the ‘Start Recording’ box to initialize recording. Click ‘Ok’ to finish the wizard.

Wizard
Start Recording
Continuous
Motion Detection

What is in the box?

Network Video Recorder
High Definition IP Cameras
Pre-made Cat5e Cables
Remote Control Mouse
NVR Power Cable
Utility Disc
Quick Start Guide
Warranty Card
Security Stickers

Troubleshooting

Problem
Solution

No display/No signal/No audio format
Make sure the VGA/HDMI cable is properly connected to both the NVR and TV/monitor.
NOTE: A laptop cannot be used as a screen.

No picture/No video
Make sure the camera is properly connected to the PoE port on the NVR or network switch. If the camera does not support PoE or you are connecting it to a non-PoE switch, you will need additional 12VDC power supply for the camera.

Cannot log in
The default user name is: admin and the default password is: abc12345. If you don’t remember your old password, please submit a ticket to us at www.laviewsecurity.com.

Camera picture is not clear
Make sure the camera is not placed behind a window, there is no interference or a strong light source in front of the camera.

Night vision is not working
The infrared arrays automatically when the environment is dark enough. You can check that the camera infrared bulbs are working properly as they turn light red in dark environments.

DVR is not recording
Check that the hard drive status is normal and is initialized under the Main Menu>HDD>General.
Enable the record mode (Normal or Motion Detection) under the Main Menu>Record>Schedule>Video for the selected camera.

Remote Viewing

View footage on your mobile devices with our app. You can either scan the provided QR code below or search LaView Net in the app store. Then scan the QR code located on the NVR for device P2P info.

1 Connect your cameras
• Connect the Cat5e cable into the camera
• Connect the other end of the Cat5e cable into the NVR PoE port.
(Repeat for all cameras)

2 Connect to your monitor/TV
• Connect your NVR and TV/monitor with a HDMI or VGA cable (Not included)

Note: Your monitor/TV must support the output resolution of the NVR or you may get a black screen or a possible error message. You cannot use a laptop as a display.

3 Connect the mouse and power
• Connect the mouse to the USB port
• Connect the NVR power cable to the NVR

4 Connect to your network (OPTIONAL)
• Connect the LAN port on the NVR to the LAN port on your router via an Ethernet cable for remote viewing on your mobile phone, tablets, PC and Mac
• You can also add existing IP cameras to your NVR from your network.

Note: The NVR will still work as a standalone video recorder if you do not have internet connection and skip this step.

5 Configure the start up wizard
• The connection is now completed. Turn on the power switch and follow the start-up wizard on your screen to configure the NVR. (Next Page)

We recommend testing all the cameras and cables prior to installation.
